1. TITLE: BACK PANEL & TOP COVER CLEANING PROCESS.

2. TOOLS REQUIRED:

S.No.	Item Name	UOM	Quantity
1.	Brush	Nos	1
2.	Cloth	Nos	1
3.	CIF polish & Rubbing Component or Equivalent	Nos	1(each)
4.	Moto max	Nos	1
5.	Foam	Nos	1

3. ACTIVITIES:

Inspection:

1. **Inspect for Wear and Tear:**
    - Examine the top cover and back panel for any signs of wear, tear, or discoloration.
    - Note any areas that may need special attention during cleaning or possible replacement if damaged.

Cleaning:

1. **Gather Cleaning Tools:**
    - Soft cloth or microfiber cloth
    - Mild detergent or cleaning solution suitable for the material
    - Warm water
    - Soft brush (optional for detailed areas)
    - Compressed air canister (optional for dust removal)
2. **Prepare Cleaning Solution:**
    - Mix a small amount of mild detergent with warm water to create a gentle cleaning solution.

3. **Clean the Top Cover and Back Panel:**
    - Dip the soft cloth or microfiber cloth into the cleaning solution and wring out excess water.
    - Gently wipe down the top cover and back panel, paying attention to any dirty or stained areas.
    - For hard-to-reach areas or detailed sections, use a soft brush.
    - If using a compressed air canister, carefully blow away any dust or debris from corners and crevices.
4. **Rinse and Dry:**
    - Use a clean, damp cloth to wipe away any remaining soap or cleaning solution.
    - Dry the top cover and back panel thoroughly with a dry cloth to prevent water spots or damage.

4. SAFETY INSTRUCTIONS

Keep the materials away from the gangway.

5. CHECKS:

Check the device for any scratches or damage.

6. RESPONSIBILITY: Operator.

7. Quality Check

Ensure that both the top cover and back panel are securely attached and check for any missed spots during cleaning.
